

# Desk Surfer™

## Owner's Manual

## GETTING STARTED

1. Once the unit is removed from packaging you are only minutes away from using your new Desk Surfer™.
2. The malleable air bladder can be adjusted via the valve on the underside of the unit. Simply attach an air pump to the valve and inflate to the desired level of stability.
  - The pressure range should fall within 0-15 PSI depending on the desired level of pressure
  - 0 PSI being very unstable requiring more coordination and metabolic demand
  - 15 PSI being very stable and easier to maintain coordination
3. Now that the bladder is filled to your chosen setting, place the unit flat on the floor to ensure the platform is level. Your Desk Surfer™ is now ready for use.

## MAINTENANCE

1. The Desk Surfer™ is virtually maintenance free. The only thing we ask is that you wipe the top surface off with a dry rag periodically to keep the standing surface from getting dirty.
2. If you have any questions or comments, contact us via the phone or email address listed below.
